There has never been a truer phrase that you get what you paid for when it comes to shocks.

At the Victorian Hot Rod Show in 2020, we were approached by many hot rod owners who were wanting a better ride for their hot rod & muscle car.

JRi Shocks have released a Hot Rod Builder Series, consisting of single & double adjustable coil over shocks suited for these vehicles. These are a motorsport-based, modern low-gas pressure technology shock, designed for optimum performance, reliability, low maintenance & 100% serviceable. They can be custom valved to suit the car by us. Never will you have to purchase another shock.

Some owners do not want to pay the price for the ultimate performance. That being said, over a 5 to 7 year period, they will likely have bought several different types of shocks to fix the problem at a few hundred dollars each to the point of totalling the same or higher amount than what it costs to purchase the JRi shocks & continue to have the same problem. The service costs are minimal on top of the 12-month warranty we cover through the JRi warranty program.

Consider your purchase. Shocks should be a lifetime investment for your pride & joy to enjoy every day.

Each shock includes spring perches/ride height adjusters to suit spring inside diameter of 2.5", spherical bearing/mono-ball mount top & bottom, custom ends may be available at an additional cost. Various eyelet lengths may be available to clear suspension components.
